## Layer Inspector

← "All Pages" is a standard layer, and will appear on all pages.

← "1, 2, 3" are pages. If you open the eye of a page, the visible page will close.

← "template", "template 1", "template 2" are template layers for all, odd, and even pages. They carry the arrangement of the page numbers (for more see next page).

## Layer Details

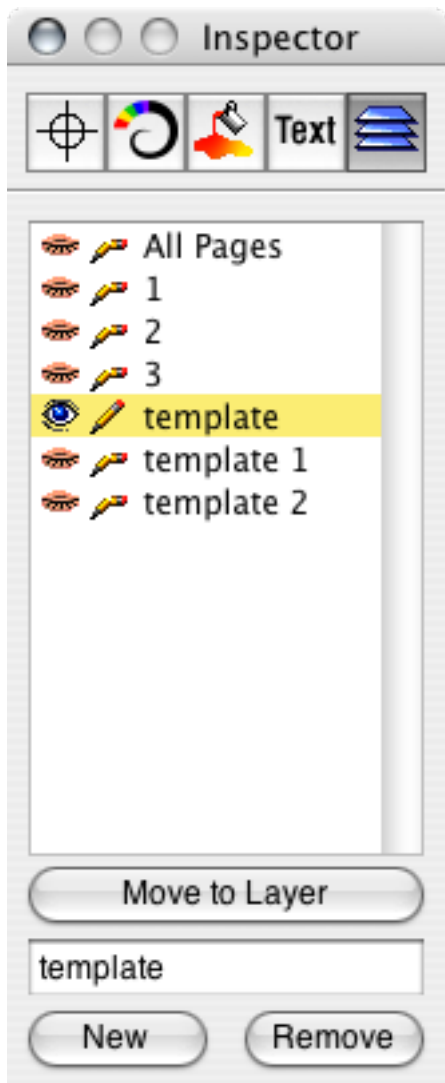

This panel is reached by a double click on the layer within the Inspector.

For pages you have to change the type to "Page".

## Layer Inspector - Templates

The template layers determine the place and look of the page numbering.

A double click on the layer opens the Layer Details to change the type of the layer.

## Layer Details - Templates

You can choose between three kinds of template layer:

- Template
- Template Odd
- Template Even

□ □ □

## Template Layer

On the template layers, you can place Text objects with place holders.  
On the left is the place holder for the odd pages. It is a text box with right aligned text.

The placeholders are replaced with the real contents.

#PAGENUM#	is replaced with the page number.
#PAGECNT#	is replaced with the number of pages.
#DATE_%Y-%m#	is replaced by the current date in the format given between the "_" and the closing "#".
%Y	year
%m	month
%d	day
%H	hour
%M	minute
%S	second
%Z	time zone
%z	hours from UTC
	and so on
